Sorry – I didn't initially see the actual response from Tala. She said this isn't a chemical ORD is working on, while PFHxS was.

I sent the risk profile to OPPT IO but haven't heard back yet about whether we'll have the resources to review. I also mentioned that ORD reviewed the one for PFHxS so maybe they'd be willing to look at this one too? They aren't giving us too much time.

I think the deca & SCCP exemptions review will be easier for me to work with when they are circulated next week, but I'm not much help with a risk profile.
